

Intern your way to a job!

The Utah Community Action Head Start program is working to expand their programming! Students have the opportunity to intern with the program and gain real-world experience as they prepare children for school. Interns will use curriculum that encourages individual development for each child, focusing on social-emotional development, language development, literacy skills, and mathematics skills. Interns will receive a stipend for their work, and there is an opportunity to transition into full-time, post-graduation work. For more information and to apply, please contact your Internship Coordinator: Dominique Blanc, d.blanc@honors.utah.edu

Multiple positions are available at multiple locations!
